Linnéa Haugen

MSc Biomedical Engineering | 2610 Rødovre

+45 31 18 12 13

Software developer with a background in biomedical engineering and experience developing web applications, APIs, and scientific data platforms for healthcare and life science organisations. Combines software development with analytical thinking to translate complex requirements into reliable, maintainable solutions and improve how systems are used in practice. Experienced working across technical and domain teams, with a strong focus on collaboration, practical problem-solving, and continuous learning.

Main strengths: Software development, systems thinking, and cross-functional collaboration

Work Experience

Configuration Specialist, Research Data Platform Consultant — *Mar 2025 –*

Lundbeck A/S via Epico, Department: Research Informatics — *Copenhagen, DK*

- Collaborate cross-functionally with internal and external stakeholders, including end users, subject matter experts, suppliers, and vendors, to establish shared understanding and alignment
- Participate in use-case discovery, requirements clarification, and solution-design reviews, providing practical feedback on assumptions, constraints, and implementation needs
- Develop and configure data pipelines for automated capture, transformation, and processing of scientific data, supporting data integrity and FAIR data principles
- Review and validate technical deliverables against agreed requirements and solution designs and coordinate clarification and follow-up where needed
- Investigate laboratory instrument software, data outputs, and configuration options to support comprehensive data capture and reproducibility
- Collaborate with instrument vendors to clarify data-capture possibilities and document export configurations to support consistent instrument setup and knowledge transfer
- Combine technical expertise with scientific, user, and stakeholder perspectives to identify risks and provide actionable recommendations related to data quality, reproducibility, compliance, operational efficiency, and scalability
- Create and manage Jira tickets, clarify expectations, monitor progress, and follow up on completion in accordance with agreed requirements and quality standards
- Implemented AWS-based observability to improve monitoring, operational visibility, and platform reliability at scale

Technical Communication Intern — *Jan 2025 – Feb 2025*

Raffle.ai — *Copenhagen, DK*

- Updated and expanded technical and user-facing product documentation to improve clarity, consistency, and usability across the platform
- Created written user guides and structured interactive walkthroughs to support correct product use and navigation
- Evaluated user flows and product interactions with a focus on usability, design consistency, and navigation
- Documented and presented user experience/interaction (UX/UI) findings and provided actionable recommendations to support continued improvement of the user experience and product documentation

www.linkedin.com/in/linnéa-haugen/

Junior Developer, Consultant *Dec 2023 – May 2024*

Novo Nordisk A/S via Epico, Department: Software Products *Måløv, DK*

- Contributed to the ongoing expansion and maintenance of an internal web application
- Designed and implemented new pages and minimal APIs
- Refactored existing code to improve structure and maintainability
- Expanded unit and integration test coverage to support reliability and safer iteration
- Investigated and resolved frontend and backend issues, improving application stability and user experience
- Implemented health checks for external dependencies to surface failures early
- Set up dashboards and alerts to support monitoring, performance awareness, and operational follow-up
- Initiated and facilitated regular backlog clean-up sessions to improve ticket descriptions, task discoverability, and shared understanding of ongoing work
- Worked closely with the Scrum Master to organize regular team demos and created & maintained shared boards for visualizing team and project progress

Web Content Specialist *Oct 2023 – Nov 2023*

Consultlocus A/S *Copenhagen, DK*

- Collaborated directly with management to clarify communication objectives and translate them into practical website improvements
- Presented proposals for UX and content design improvement; Refined these based on stakeholder feedback
- Improved website usability and information structure through UX-focused layout adjustments, streamlined navigation, and clearer content hierarchy
- Produced graphic and visual refinements to improve coherence, readability, and overall presentation
- Performed front-end work within a CMS environment, including HTML updates, WordPress content and layout changes, media integration, and bug fixes
- Supported marketing-related activities where digital communication, design, and technical implementation overlapped

MSc Thesis Student - Auditory Signal Processing *Feb 2023 – Jun 2023*

WSA, Department: R&D PSA S&F Audiology *Erlangen, DE*

- Conducted exploratory research in auditory signal processing focused on spectro-temporal masking in complex environments
- Designed, implemented, and evaluated signal processing algorithms to explore their feasibility, limitations, and perceptual relevance
- Planned and conducted controlled listening experiments to evaluate the effects of different processing strategies
- Piloted experimental setups, stimuli, and parameters before conducting the full experiments
- Prepared and quality-checked experimental data and performed statistical analysis of the results
- Evaluated research findings critically and communicated conclusions to academic and industrial supervisors

Teaching Assistant - Deep Learning course *Sep 2021 – Jan 2022*

Technical University of Denmark, Department: DTU Compute *Lyngby, DK*

- Helped students solve assignments and supported them during their project work
- Acted as technical sparring partner for student projects regarding selection, implementation, and evaluation of neural networks e.g. methodological limitations and ideal use cases for different models
- Provided feedback on student projects
- Oversaw and evaluated final exam presentations

linnea_haugen@hotmail.com +45 31 18 12 13 www.linkedin.com/in/linnéa-haugen/

Research Assistant *Apr 2020 – Mar 2021*

Rigshospitalet, Department: The Functional Imaging Unit (FIU) - The MRI research unit *Glostrup, DK*

- Supported clinical research projects from participant preparation and MRI acquisition through data processing, quality control, and quantitative analysis
- Conducted MRI examinations for clinical research in accordance with established hospital, research, and MRI-safety procedures
- Received, prepared, positioned, and monitored research participants throughout MRI examinations
- Performed MRI safety screening and applied physiological monitoring (incl. ECG, pulse oximetry, and blood-pressure monitoring)
- Planned imaging sequences and transferred imaging data following completed examinations
- Performed post-processing and quantitative analysis of MRI data
- Developed a deep-learning-based method for automatic kidney segmentation and image co-registration in MRI time series as part of my bachelor's thesis. The method was subsequently implemented in the department's analysis workflow
- Reduced manual analysis work and variability, thereby improving the reliability and reproducibility of the analysis process

Engineering Intern *Nov 2019 – Jun 2020*

Rigshospitalet Glostrup, Department: Clinic for clinical Physiology, Nuclear medicine, and PET *Glostrup, DK*

- Performed and documented quality controls/quality assurance of medical devices for imaging and diagnostics (MRI, CT, PET, SPECT, ultrasound, and related systems).
- Supported technical troubleshooting, maintenance, and repair of medical devices within the department, escalating complex faults to manufacturers when required
- Contributed to the review and standardization of clinical protocols
- Updated technical documentation and safety reports
- Created and updated SOP's for the operation of medical devices
- Supported data analysis tasks related to clinical research

Student Assistant *Apr 2018 – Jun 2020*

Radiometer, Department: Distribution, later Shipping *Brønshøj, DK*

- Picked, checked, packed, and prepared medical products for shipment
- Followed customer-specific handling, documentation, and shipping requirements
- Supported specialized shipments requiring additional handling procedures
- Contributed flexibly across distribution tasks to support team capacity and reliable delivery
- Prepared and issues invoices as well as credit notes
- Archived completed order picking lists

Education

MSc in Biomedical Technology Engineering *Feb 2021 – Jul 2023*

DTU, The Technical University of Denmark *Lyngby, DK*

Area: Medical science, Information technology, and Product development with Biomedical application
Focus: Data Science, Machine Learning, Data Analysis, Signal Processing, Statistical Analysis, and Audiology

Study Abroad – Hong Kong *Spring 2022*

HKUST, Hong Kong University of Science and Technology *Clearwater Bay, HK*

Area: Human-Computer Interaction (HCI), Regulatory affairs in healthcare, and AI for medical data analysis.

linnea_haugen@hotmail.com +45 31 18 12 13 www.linkedin.com/in/linnéa-haugen/

BEng, Healthcare Technology *Sep 2017 – Jan 2021*

DTU, The Technical University of Denmark *Ballerup, DK*

Area: Medical science, information technology, and medico technology.
Focus: Application development and optimization of data analysis.

Competencies

Soft Skills

- Systems Thinking
- Analytical Problem Solving
- User-Centered Problem Solving
- Use Case Discovery
- Solution Design & Validation
- Cross-Functional Collaboration
- Stakeholder Communication
- Knowledge Sharing & Facilitation
- Process Improvement
- Risk Assessment
- Requirements Engineering
- Technical Communication & Documentation
- Agile / Scrum
- Experimental Design & Evaluation

Data & Analytics

- Python
- SQL
- Machine Learning & Deep Learning
- Statistical Modelling
- Data Analysis & Visualization
- Scientific Data Workflows
- Data Pipelines & Validation
- SAS JMP
- Statistical Analysis
- Data Transformation & Modelling
- Signal Processing
- Medical Image Analysis
- Computer Vision
- Experimental Design

Technology & Systems

- C# / .NET
- Git / GitHub
- REST APIs
- CI/CD Workflows
- AI-assisted Development
- Docker
- AWS
- Grafana
- Jira / Azure DevOps
- Postman
- VS Code / Rider
- UX/UI
- SOLID Principles
- MATLAB
- PyTorch
- Power BI
- Linux
- Unit & Integration Testing
- Technical Documentation

Languages

- Danish, Native
- English, Fluent
- German, Intermediate
- Spanish, Fundamental

Personal Profile

I am a very passionate, outgoing, and curious person who loves learning, experimenting, and immersing myself in every area of my work. As a creative handywoman, I engage in different projects—everything from sewing to building a balcony for the family dog. I go bouldering, knit, read novels, play board games, brew wine, and enjoy outdoor activities, especially hiking—there is nothing like jumping up a mountain.
