# Linnéa Haugen

MSc Biomedical Engineering | 2610 Rødovre

+45 31 18 12 13

Technical analyst with a background in biomedical engineering, data analysis, machine learning, and complex data-driven systems. I enjoy turning large and messy datasets into insights, understanding how systems behave in practice, and identifying opportunities for improvement. Across healthcare, research, and technology environments, I have worked at the intersection of technical implementation, analysis, and user needs. I thrive in collaborative teams, enjoy learning from skilled colleagues, and am motivated by challenging analytical problems where data can support better decisions.

**Main strengths:** Systems thinking, analytical problem solving, and data-driven decision making

## Work Experience

**Configuration Specialist,** Research Data Platform Consultant — *Mar 2025 –*

*Lundbeck A/S via Epico, Department: Research Informatics* — *Copenhagen, DK*

- Collaborate cross-functionally with internal and external stakeholders, including suppliers, end-users, and vendors, to ensure alignment and transparency
- Participate in use case discovery sessions and review discovery- and solution design documentation, providing practical feedback and identifying gaps to improve solution design
- Develop and configure data pipelines for automated data capture and processing, optimizing workflows, and supporting FAIR data principles
- Review and validate deliverables from external teams, ensuring they meet requirements and uphold data integrity standards; coordinate follow-ups as needed
- Improve runtime validation and type safety in data pipelines to increase reliability and reduce downstream data issues
- Set up and maintain CI/CD workflows and deployment automation to support safer releases, validation, and long-term maintainability
- Structure and clarify development tasks and technical documentation to improve visibility, maintainability, and onboarding efficiency
- Investigate laboratory instruments and data to ensure sufficient data capture for reproducibility and compliance
- Consider stakeholder perspectives to identify risks related to data quality and operational efficiency, as well as recommend actionable improvements
- Creating user instruction guides to help users during digital transformation
- Implemented AWS-based observability to centralize logs and monitoring across platforms, improving operational overview and reliability at scale.

**Technical Communication Intern** — *Jan 2025 – Feb 2025*

*Raffle.ai* — *Copenhagen, DK*

- Update and expand technical and user-facing documentation
- Create visual guides and evaluate UX/UI by identifying and reporting bugs/inconsistencies
- Providing actionable feedback on usability, design consistency, and user flows
- Present insights and solutions to enhance user experience and optimize documentation clarity

**Junior Developer,** Consultant *Dec 2023 – May 2024*

*Novo Nordisk A/S via Epico, Department: Software Products* *Måløv, DK*

- Expanding and maintaining a web application: Designed new pages and APIs,
- Optimizing and refactoring code, updating data models, and expanding test coverage with unit & integration tests
- Added health checks for external dependencies, set up Grafana dashboards and alerts for monitoring, improving performance, and increasing reliability.
- Facilitated team collaboration by initiating backlog clean-up meetings, organizing team demos, and creating a board for holistic team progress visualization.

**Web Content Specialist** *Oct 2023 – Nov 2023*

*Consultlocus A/S* *Copenhagen, DK*

- Conducted meetings to align communication, presented solutions to the management team, and gathered feedback for strategic improvements
- UX, Graphic design, front-end development, and assistance in marketing tasks
- Enhanced navigation, visuals, and communication features by updating layouts, integrating media, resolving bugs, and streamlining content.

**MSc Thesis Student** – Auditory Signal Processing *Feb 2023 – Jun 2023*

*WSA, Department: R&D PSA S&F Audiology* *Erlangen, DE*

- Developing strategies for Spectro-Temporal masking reduction for people with broadening auditory filters via spectral complexity reduction and spectral contrast enhancement.
- Research, algorithm design, implementation, experiment design, piloting, conducting user experiments, and result analysis.

**Teaching Assistant** - Deep Learning course *Sep 2021 – Jan 2022*

*Technical University of Denmark, Department: DTU Compute* *Lyngby, DK*

- Helped students with solving assignments and acted as a sparring partner on projects.
- Giving project feedback as well as overseeing and evaluating exam presentations.

**Research Assistant** *Apr 2020 – Mar 2021*

*Rigshospitalet, Department: The Functional Imaging Unit (FIU) - The MRI research unit* *Glostrup, DK*

- Conducting data analysis and MRI scans for clinical trials
- Handling patients, applying vital monitors, conducting MRI scans, analyzing data, and attending research lectures.

**Engineering Intern** *Nov 2019 – Jun 2020*

*Rigshospitalet Glostrup, Department: Clinic for clinical Physiology, Nuclear medicine, and PET* *Glostrup, DK*

- Quality assurance and maintenance of medical devices in the department.
- Perform data analysis and assist in research trials.
- Creating instruction manuals, updating protocols, and updating safety reports.

## Education

**MSc in Biomedical Technology Engineering** *Feb 2021 – Jul 2023*

*DTU, The Technical University of Denmark* *Lyngby, DK*

Area: Medical science, Information technology, and Product development with Biomedical application
Focus: Data Science, Data Analysis, Data Processing, Audiology, and AI

linnea_haugen@hotmail.com +45 31 18 12 13 www.linkedin.com/in/linnéa-haugen/

**Study Abroad – Hong Kong** *Spring 2022*
*HKUST, Hong Kong University of Science and Technology* *Clearwater Bay, HK*

Area: Human-Computer Interaction, Regulatory affairs in healthcare, and AI for medical data analysis.

**BEng, Healthcare Technology** *Sep 2017 – Jan 2021*
*DTU, The Technical University of Denmark* *Ballerup, DK*

Area: Medical science, information technology, and medico technology.
Focus: Application development and optimization of data analysis.

## Competencies

### Soft Skills

- Systems Thinking
- Analytical Problem Solving
- User-Centered Problem Solving
- Use Case Discovery
- Solution Design & Validation
- Cross-Functional Collaboration
- Stakeholder Communication
- Knowledge Sharing & Facilitation
- Process Improvement
- Experimentation & Evaluation
- Agile / Scrum

### Data & Analytics

- Python
- SQL
- AI & Machine Learning
- Statistical Modelling
- Data Analysis & Visualization
- Scientific Data Workflows
- Data Pipelines & Validation

### Technology & Systems

- Git / GitHub
- Power BI
- Grafana
- Docker
- Jira / Azure DevOps
- AWS
- UX/UI
- Postman
- SAS JMP
- VS Code / Rider
- CI/CD Workflows
- REST APIs
- C# / .Net

### Languages

- Danish, Native
- English, Fluent
- German, Intermediate
- Spanish, Basic

## Personal Profile

I am a very passionate, outgoing, and curious person who loves learning, experimenting, and immersing myself in every area of my work. As a creative handywoman, I engage in different projects—everything from sewing to building a balcony for the family dog. I go bouldering, knit, read novels, play board games, brew wine, and enjoy outdoor activities, especially hiking—there is nothing like jumping up a mountain.
